

I want to help Conquer CHD!

Congenital heart defects are the most common birth defects and leading cause of infant death.
Thanks to advancements in treatment, survival is improving.
Yet, survivors are at risk for serious life-long complications.

We need more research

- NIH funding for life-saving research
- Increased CDC funding for life-long surveillance

We need quality

- Clear identification of quality markers
- Hospital and clinic transparency about their outcomes

Pediatric Congenital
Heart Association
